

EASTLAKE WOODLANDS -- CONDO VII

June 22, 2020

Fellow Residents:

We all agree that recycling is important for our environment and Condo VII Board of Directors support this effort 100%. We currently pay over \$100/month for our recycling bins. Over the past several months our bins have been filled with many inappropriate recycling materials. We CANNOT put our recycles in plastic trash bags, caps on bottles, pizza boxes, Styrofoam take-out containers, as well as other non-recycle materials. *When in doubt, throw it out !*

When our bins get to the recycle facility, the sorters and equipment cannot handle the trash and so the whole bin is not recycled. This is a waste of effort, time and money. We believe our community wants to support the environment and maybe are unclear on the items and disposal process.

To keep everyone up to speed, please remember to check the information posted on our bulletin boards, email blasts and website so we all are well informed on recycling.

Thank you for your cooperation,

Diana, Carole, Susan, Jeanne, Al
