

Notice to Residents of **Bldgs 2, 3 and 4**

Fire System Installation Update

Please be advised due to the COVID-19 and the restrictions given by the State and County the interior installation of the Fire System has been postponed until further notice.

Cox Fire has also informed us that they will continue to oversee the safety of their employees and will only begin to re-schedule the installation(s) when they can ensure the safety of their employees.

The external panels are still scheduled for installation. So far, the exterior panel for building 2 has been installed and panels for buildings 3 and 4 will be installed at in the next couple of weeks. We will notify residents of the new schedule when available.

During these difficult times we will try our best to keep everyone informed.

STAY SAFE
